

Engagement Workshops August/September 2020

Ensuring a fair and equitable transition virtual workshop looking at the impact future policy aimed at addressing climate change could have on New Zealanders, households, and communities. Recognising that if it is not managed carefully, the transition could have a detrimental impact on some New Zealanders, particularly those that are isolated or vulnerable. As part of our advice we would like to provide insight into what could be done to mitigate any potential negative impacts – and how Aotearoa can ensure a fair and equitable transition.

Workshop details: 1 – 3.30pm on Monday 17 August

Attendees:

Caritas		
Wesley Community Action		
Generation Zero		
NZUSA		
Akl University		
Budget Advice Service – FinCap		
Ecumenical Climate Justice Network		
MBIE		
Venture Taranaki		
Age Concern		

Virtual workshop on behaviour change looking at how the government could use behaviour change as a tool for addressing climate change and reaching the country's climate goals.

Workshop details: 1 – 3.30pm on Thursday 20 August

Attendees:

	Victoria University	
	Otago University	
	Action Station	
	Health Promotions Agency	
	Otago University	
	ACC	
	The Workshop	
	Connect and Co	
	The Navigators	
	Ora Taio

Virtual workshop on Urban Design looking at how the design and construction of our cities and towns, transport systems and buildings could be used to address and adapt to climate change. We recognise the transition requires a systems-wide way of thinking and that urban design is central the way we live and move in our communities. Because of this we are looking for expert insights that can be incorporated into our work.

Workshop details: 1 – 3.30pm on Wednesday 26 August

Attendees:

Greater Auckland		
HUD		
Cycle Action Network		
Living Streets		
New Zealand Centre for Sustainable Cities		
NZ Institute of Architects		
NZ Green Building Council		
Z Energy		
Kainga Ora		
<u>Papapounamu - Interest group from NZPI</u>		
The University of Auckland		
Property Council NZ		
Victoria University of Wellington		
Millions of Mothers		
Independent Maori Statutory Board		

Equitable Transport virtual workshop looking at the role transport will play in the transition to a low-emissions society, and the impact this could have on equitable and accessible transport. Transport is at the core of our response to climate change but if it is not managed carefully, changes made to our transport systems could have a detrimental impact on some communities or groups. As part of our advice we would like to provide insight into could be done to mitigate these negative impacts – and how Aotearoa can ensure a just transition.

Workshop details: 10 – 12.30pm on Thursday 27 August

Attendees:

UNCRPD / Sustained Ability		
Millions of Mothers		
Lincoln University / Intelligent Transport Systems		
Greater Auckland		

Women in Urbanism Aotearoa		
Southern Initiative		
Rural Women New Zealand		
Blind Low Vision NZ		
NZ road controlling authorities		
MSD		
Disabled Persons Assembly		
Hoe360		
MRCagney		
Z Energy		
Rural Woman NZ		
Community Waikato		
Independent Maori Statutory Board		
Otago University		
Sustained Ability		
Otago University		

Rural Communities virtual workshop looking at the impact on rural communities of future work by government aimed at addressing and adapting to climate change. You already know what it takes to support your community, so we want to hear from you, and ensure your insights feed into our analysis and advice. Early engagement that is about learning and listening, we are just starting to build our knowledge in this space and will be engaging with other groups throughout the development of our advice and our consultation process.

Workshop details: 9.00 – 11.30am on Thursday 3 September

Rural Women		
Rural Support Trust		
JS Consulting for CCILG		
Wairoa DC		
Community Waitkato		
Gisborne Area		
Tararua Area		
Manawatu/Horowhenua area		
Manawatu/Horowhenua area		
MPI		

Owahanga Station/50 shades of Green

Virtual workshop on bioeconomy looking at the bioeconomy and use of biomass (including waste), biofuels and building products to reduce Aotearoa's emissions. We will bring together a mix of stakeholders (suppliers, consultants, industry, and academics) in forestry, waste and building to have a discussion on the opportunities and barriers for the bioeconomy to reduce emissions.

The kind of questions the workshop will cover include:

1. What are the opportunities in New Zealand's bio-economy, particularly around bio-fuels and building products?
2. How should we harness those opportunities?
3. What are some of the challenges or barriers to overcome?

Workshop details: *1 – 4pm on Tuesday 10 September*
